State Operations Center	Inland Region EOC	Coastal Region EOC	Southern Region EOC
Level 1	Level 1	Level 1	Level 1

Cal OES COASTAL REGION

Roadway Damage due to Winter Storms, Humboldt County

On 12/19/16 at 1712 hours the California State Warning Center (CSWC) received a Proclamation from Humboldt County declaring a local emergency due to damage to roadways caused by recent storms and flooding. There are approximately 6 roads in the area that have either sustained damage or are in danger of sustaining damage due to landslides caused by recent winter storms to include California Disaster Assistance Act (CDAA).

- Humboldt County has requested all available recovery assistance from the State and Federal Government.
- The Cal OES Fire Duty Officer (FDO) and Cal OES Coastal Region Duty Officer (CDO) are in contact with Humboldt County and providing updates as they become available.
- On 12/21/16, Board of Supervisors (BOS) Minute Orders and a CDAA Request Letter was received for the Proclamation from Humboldt County for storm damages.

Cal OES INLAND REGION

Cal OES SOUTHERN REGION

Train Derailment, Colton, San Bernardino County, Spill 16-7827

On 12/27/16 at 0619 hours, the California State Warning Center (CSWC) received a report from Union Pacific Railroad (UPRR) advising that a locomotive, Locomotive #UP8069, derailed upright at the Colton yard.

- There was no hazmat release and no reported impacts to waterways.
- There were no injuries to crew members.
- Crews are on scene re-railing the locomotive.
- The CSWC made all appropriate notifications per Hazardous Materials SOP.

SITUATION SUMMARY

Cal OES SOUTHERN REGION

Natural Gas Release, Porter Ranch, Los Angeles County, SPILL: 16-7798

On 12/24/16 at 1413 hours, the California State Warning Center (CSWC) received a report from Southern California Gas Company (SoCal Gas) advising of an unknown amount of natural gas vapor releasing from the Aliso Canyon Storage Facility, wellhead #SS25. The release was discovered on 12/24/16 at approximately 0745 hours as part of daily patrols and inspections a very slight and intermittent observation of methane was detected utilizing infrared camera technology (FLIR) at the #SS25 wellhead at the Aliso Canyon Storage Facility.

- On 12/26/16, the CSWC received an update from SoCal Gas. They continue to monitor conditions at the site. Slight off-gassing continues, with no change in conditions and no other anomalies identified. There are no detectable odors and there is no indication of a present or potential hazard to human health, safety or the environment.
- SoCal Gas believes this is a continuation of off-gassing from the soil that has previously been observed at other locations at the site. This recent off-gassing of the soil coincides with the recent intense rain events at the site and is not believed to pose a present or potential hazard to human health, safety, or the environment.

WEATHER OF CONCERN

Weather of Concern

- The National Weather Service in San Francisco has issued a Freeze Warning for various coastal counties which is in effect until 12/27/16 at 0900 hours.
- **Active Weather Warnings, Watches and Advisories by County:**
http://www.wrh.noaa.gov/sto/brief/wwa_bc_cal.php

WEATHER SYNOPSIS BY REGION

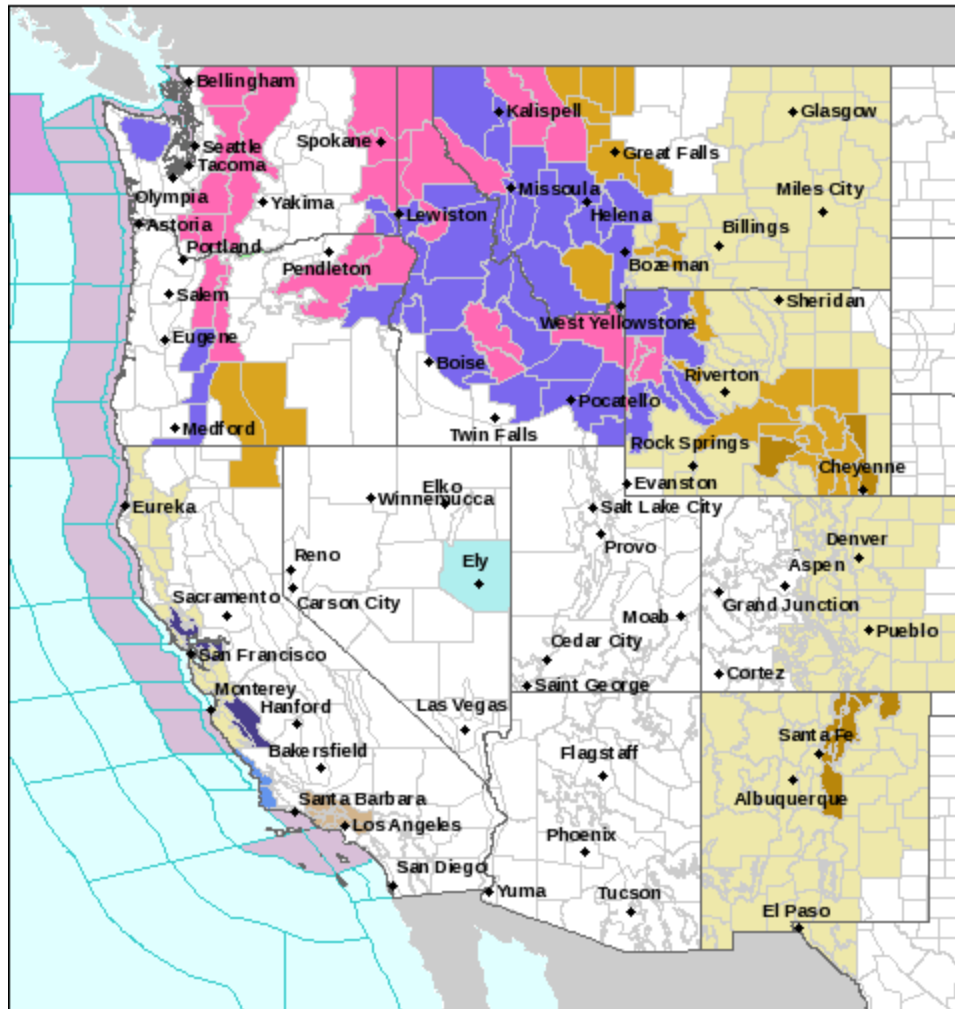

NORTHERN CALIFORNIA

Quite a bit of high cloudiness has spread across the region early this morning as a weather system moves by to our north. Coupled with ridging building in, temperatures are considerably milder across most of interior Northern California compared to 24 hours ago. Current readings are in the teens and 20s in the mountain valleys with 30s elsewhere. Dry weather will be prevalent this week, though a few light showers will be possible today over the northern mountains as the tail end of the system brushes Northern California. Overnight lows are expected to be a little milder the next few nights, though some upper 20s will be possible again in the Central Valley. Milder daytime temperatures are expected beginning mid-week.

SOUTHERN CALIFORNIA

Breezy offshore flow will bring above normal temperatures through Thursday. A series of lows will bring below normal temperatures and precipitation from Thursday night to Saturday night and on Monday. Currently there is a 6 mb offshore push from both the east and the north. The offshore flow results from a cold high pressure system over the Great Basin and a surface low to the southwest of Los Angeles. Low end wind advisories are in effect for most of Los Angeles and Ventura Counties, but mostly for areas near the passes and canyon. A cold area sits atop of Southern California at the intersection point of Cyclonic flow to the northeast and southwest and Anticyclonic flow to the northwest and southeast. Max temps will be near normal across the area.
